SRI VARDHAN CHALAMALA

6303306905 | srivardhanch12@gmail.com | linkedin | github| Portfolio

Summary

Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning, with hands-on experience developing interactive web applications using React.js, TypeScript, JavaScript, HTML5, and CSS3. Skilled in building responsive user interfaces, integrating REST APIs, and translating product requirements into functional web experiences. Familiar with UI/UX design principles, and prototyping using Figma. Passionate about combining frontend engineering and creative problem-solving to develop intuitive, user-centric digital products.

Education

Parul University Sep 2023 – May 2027
Bachelor of Technology in Computer Science and Engineering – AI and ML Vadodara, Gujarat
Westberry High School 2022 – 2023
12th Standard West Godavari, Andhra Pradesh
Westberry High School 2020 – 2021
10th Standard West Godavari, Andhra Pradesh

Projects

IRES – AI-Powered Interview & Response Evaluation System | React.js , JavaScript , HTML , CSS,Prompt Engineering, OpenAI API, LLM Workflow Design GitHub

- Developed an interactive AI-powered interview platform featuring real-time voice interactions, adaptive questioning, and automated response evaluation.
- Built user-facing interview workflows to support personalized interview experiences across different domains.
- Integrated AI-powered evaluation pipelines to generate structured feedback and performance assessments.
- Focused on creating an intuitive interface that simplifies the interview process and improves user interaction.

Hiver – AI-Powered Apple Support Agent | Python , NLP , Gemini API GitHub

- Developed an AI-powered customer support agent to classify customer queries and retrieve relevant historical support cases.
- Implemented context-aware response generation to provide relevant solutions to customer queries.
- Designed risk assessment and escalation workflows to identify sensitive or uncertain requests requiring human intervention.
- Implemented an evaluation pipeline to assess response quality and system reliability.

Technical Skills

Programming Languages: Python, JavaScript – with working knowledge of OOP principles, data structures, and REST API integration
Core CS Fundamentals: Data Structures & Algorithms (BFS, DFS, Graph Traversal), Object-Oriented Programming, SQL & Databases, REST APIs
AI Development: Prompt Engineering, LLM Workflow Architecture, AI Agent Design, AI Output Validation, OpenAI API, Anthropic API
AI Tools & Platforms: Claude, ChatGPT, Gemini, Cursor, Copilot, Bolt.new, Lovable, v0 by Vercel, Replit AI
Web Technologies: HTML, CSS, JavaScript, React, REST API Integration, Responsive UI/UX Design
Deployment & Tools: Git, GitHub, Vercel, Netlify, GitHub Pages, VS Code, Postman

Achievements and Other Interests

- Archery – State Level Bronze Medalist
- Independent Film Direction and Screenwriting
- Creative Story Writing
- Photography
