SRI VARDHAN CHALAMALA

6303306905 | srivardhanch12@gmail.com | linkedin.com/in/sri-vardhan-chalamala | github.com/srivardhanch12

Summary

Computer Science and Engineering (AI ML) undergraduate with strong foundations in software development, problem solving, and AI-assisted engineering. Experienced in building AI-powered applications using Large Language Models, REST APIs, and modern development tools. Proficient in leveraging ChatGPT, Claude, Gemini, Cursor, and GitHub Copilot to accelerate development, debugging, testing, and documentation workflows. Passionate about building scalable software solutions, continuously learning emerging technologies, and applying AI to improve software engineering productivity.

Education

Parul University — Sep 2023 – May 2027
Bachelor of Technology in Computer Science and Engineering – AI and ML — Vadodara, Gujarat

Westberry High School — 2022 – 2023
12th Standard — West Godavari, Andhra Pradesh

Westberry High School — 2020 – 2021
10th Standard — West Godavari, Andhra Pradesh

Relevant Coursework

- Artificial Intelligence
- Data Structures & Algorithms
- Database Management (SQL)
- Web Technologies
- Machine Learning
- Object-Oriented Programming
- Prompt Engineering
- LLM Application Design

Projects

AI-Powered Virtual Interviewer | Prompt Engineering, OpenAI API, LLM Workflow Design — 2026

- Architected and deployed a fully functional live AI mock interview system featuring real-time voice interaction, adaptive domain-specific questioning, and instant response evaluation.
- Engineered advanced prompt workflows and LLM pipelines to simulate real-world hiring processes with personalized feedback and data-driven scoring across multiple interview domains.

Maze Solver | JavaScript, Python, HTML, CSS — November 2025

- Developed an interactive maze-solving system implementing graph traversal algorithms including Breadth-First Search (BFS) and Depth-First Search (DFS) with visual output.

Technical Skills

Programming Languages: Python, JavaScript – with working knowledge of OOP principles, data structures, and REST API integration
Core CS Fundamentals: Data Structures & Algorithms (BFS, DFS, Graph Traversal), Object-Oriented Programming, SQL & Databases, REST APIs
AI Development: Prompt Engineering, LLM Workflow Architecture, AI Agent Design, AI Output Validation, OpenAI API, Anthropic API
AI Tools & Platforms: Claude, ChatGPT, Gemini, Cursor, Copilot, Bolt.new, Lovable, v0 by Vercel, Replit AI
Web Technologies: HTML, CSS, JavaScript, React, REST API Integration, Responsive UI/UX Design
Deployment & Tools: Git, GitHub, Vercel, Netlify, GitHub Pages, VS Code, Postman

Achievements and Other Interests

- Archery – State Level Bronze Medalist
- Independent Film Direction and Screenwriting
- Creative Story Writing
- Photography
